

## Assignment – Module 8

1. The annual discharge (in cumec) data at a site for a particular day is given for 14 years.

Obtain the missing value.

| Year      | 1    | 2    | 3    | 4    | 5    | 6    | 7    | 8    | 9 | 10   | 11  | 12  | 13   | 14   | 15  |
|-----------|------|------|------|------|------|------|------|------|---|------|-----|-----|------|------|-----|
| Discharge | 1362 | 2242 | 1136 | 2002 | 1240 | 1202 | 1706 | 1767 | ? | 1407 | 809 | 866 | 1862 | 1035 | 935 |

2. Out of 8 years of data for a particular day, April 5<sup>th</sup>, data for one year is missing and needs to be filled up. Number of non-zero flows on Apr. 5<sup>th</sup> (leaving out the year in which the data is being filled) is 3 with an average flow of 3.25 units. Fill the single missing value for this date.
3. The annual rainfall (in mm) given below is for two stations. Obtain the double mass curve and check the consistency in the data.

| Year    | Station-1 | Station-2 | Year      | Station-1 | Station-2 |
|---------|-----------|-----------|-----------|-----------|-----------|
| 1964-65 | 4189.9    | 4932      | 1984-85   | 3650.9    | 5925      |
